

## **AMENDMENTS TO THE SPECIFICATION**

Please delete Paragraphs [0012], [0013] and [0014] of the specification.

Please add the following paragraph on page 1 after the subtitle "CROSS REFERENCE TO RELATED APPLICATIONS".

**[0000.1]** This application is a continuation of PCT/EP02/10851, filed September 27, 2002, which claims priority to German Application No. 101 47 641.8, filed September 27, 2001, which are incorporated by reference herein.

Please add the following paragraphs on page 4 after the subtitle "BRIEF DESCRIPTION OF THE DRAWINGS".

**[00008.1]** Two example embodiments of the fabric in accordance with the invention will now be detailed with reference to the drawing in which

**[00008.2]** Fig. 1 is a diagrammatic fabric section showing printed markers.

**[00008.3]** Fig. 2 is a diagrammatic fabric section showing woven markers.

Please insert an Abstract section of the specification.

### **ABSTRACT**

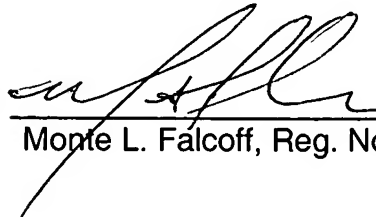

The invention relates to a method for producing woven airbags, especially at least partially multi-layered airbags. Said method comprises the following steps: a) the warp threads are prepared in the warping room, warp threads which are suitable as marker threads for machine-readable markings being already placed in the warp; b) the airbag material is woven, weft threads which are suitable as marker threads for machine-readable markings being interlaced over at least part of the width of the cloth;

and c) the airbag is cut out of the airbag material using a cutting device which is guided by the interlaced machine-readable markings.

Respectfully submitted,

Dated: February 23, 2004
